

# Solar power generation who to contact

Does DTE Energy install solar?

While DTE Energy does not install solar or other renewable energy generation systems for our customers, we have an important role to play in connecting your private generation system to the grid. The Rider 18 Distributed Generation Program is available to DTE customers with qualified renewable energy on-site generation.

How do I find a good solar contractor?

Another great resource is the SCE Solar Marketplace, an easy-to-use, one-stop shopping service; offering customers a reliable resource to search solar vendors, compare prices of rooftop solar systems, finance options, and receive the benefit of having multiple vendors bid for their business. SCE does not endorse or recommend any solar contractor.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

How do businesses use solar technology?

Businesses and industry use solar technologies to diversify their energy sources, improve efficiency, and save money. Energy developers and utilities use solar photovoltaic and concentrating solar power technologies to produce electricity on a massive scale to power cities and small towns. Learn more about the following solar technologies:

Are PV systems grid-connected?

Since 2004, most PV systems in the United States are grid-connected--they are connected to an electric power grid. These PV systems are installed on or near homes and buildings and at utility-scale power plants that have at least 1 megawatt of electric-generation capacity.

How does solar power work?

Energy developers and utilities use solar photovoltaic and concentrating solar power technologies to produce electricity on a massive scale to power cities and small towns. Learn more about the following solar technologies: Converts sunlight directly into electricity to power homes and businesses.
