

# Solar power generator promotion

What can a solar powered generator charge?

These generators can charge power tools in the shop, laptops for remote work, and personal devices like bluetooth headphones and speakers. A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage.

What is a solar powered generator?

Solar-powered generators--also called portable power stations--are a growing sector of the power market. I started using these a few years ago and was thrilled with having a clean, efficient charging system that doesn't roar or burn through gas.

Which solar generator should I buy?

Anker is another leader in the backup power space, and the Anker 757 solar generator is the model I recommend to friends and family who are looking for top value. It impressed our testers with its smart design, solid construction and competitive pricing.

What is the best solar generator?

Overall, our choice for the top solar generator is the Jackery Portable Power Station Explorer 500, which provides over 500 watt-hours and eight output ports, but is still lightweight enough to bring with you on the go.

Can a solar powered generator protect your home?

The best protection used to be a gas backup generator, but our experts in the Home Improvement and Outdoor Lab at the Good Housekeeping Institute now say it's worth checking out another solution: a solar powered generator.

How much power does a portable solar generator use?

The wattage required to run each item may vary, and most portable solar generators can power in the range of 100-500 watts. Smaller units typically have a lower power capacity and can only charge small devices.
