Will the demolition of a Nottinghamshire Power Station create thousands of jobs?

More info The demolition of a Nottinghamshire power station and the cutting edge industry hub planned to replace it could create thousands of jobs. Ratcliffe-on-Soar Power Station, owned by international energy company Uniper, will close at the end of September 2024 in line with government policy to end coal-fired power generation.

Will Ratcliffe-on-Soar Power Station be decommissioned?

Demolition of the cooling towers and the rest of the 655-acre site will start once decommissioning is complete. Follow BBC Nottingham on Facebook, on X, or on Instagram. Send your story ideas to eastmidsnews@bbc.co.uk or via WhatsApp on 0808 100 2210. Ratcliffe-on-Soar Power Station is closing after 57 years generating electricity.

What happened at a former power station in Nottinghamshire?

Further demolition work has taken place at a former power station in Nottinghamshire. Residents were warned of explosions at Cottam, which closed in 2019 and is being cleared in stages. The latest phase saw an FGD duct - part of the emissions processing system - levelled, along with test blasts on the chimney stack and a cooling tower.

Why is the UK Power Station undergoing a two-year decommissioning & demolition process?

The power station, which has been operating since 1967, is to undergo a two-year decommissioning and demolition process. It's a symbolic moment, a marker along the UK's journey to decarbonisation and net-zero. For centuries, coal was the main source of energy in the UK.

When will the UK's last coal-fired power station stop generating electricity?

Ratcliffe Power Station in Nottinghamshire - the UK's last coal-fired power station - will stop generating electricity in just three months' time. With its eight giant cooling towers, it's been keeping the lights on across the region since 1967.
