

Renewable sources--hydroelectric power, wind, biomass, and solar energy--now cover up to 98% of Uruguay's energy needs in a normal year and still over 90% in a very dry one, according to Méndez. The central role of wind in the country's energy mix has demonstrated that if a system is designed correctly, it can be flexible enough to ...

Find out more about our solar energy services. Solar energy is the most renewable energy source available. Today's technology enables us to capture solar energy for several uses, including electricity, heating and cooling systems, lighting and concentrating power.

Legislative support for solar power has existed since 2013 and the total installed capacity of distributed solar generation reached 270 MW in 2022. Uruguay receives an average 1,700 KW per square meter of sunlight a year, on a par with Mediterranean countries although solar represents only a fraction of the country's total electricity production.

Uruguayan solar panel installers - showing companies in Uruguay that undertake solar panel installation, including rooftop and standalone solar systems. 21 installers based in Uruguay are ...
