Efficient and environmentally friendly, the use of solar PV or solar panels in Guernsey is on the up. A fantastic investment, they are a great way to reduce your carbon footprint and make your ...

Solar electricity panels, also known as photovoltaics (PV), capture the sun's energy and convert it into electricity that you can use in your home. You'll need a more or less south-facing, unshaded roof or garden area. You'll then need to think about your current electricity demand and what size of system you might need.

4 ???· "The development is of a significant scale in the context of Guernsey for solar, with available land for large scale projects being limited," he stated in the planning report. "It is understood that we are approximately 50% of the way to the 2025 target of 5MW total installed solar within the island, and the development of this project ...
