

Solar rooftop panel factory

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

Can solar panels be installed on a warehouse roof?

Solar panels are also less susceptible to damage from wear and tear because they do not have any moving parts. As a result, you can expect little to no repairs. A typical warehouse or factory roof is the perfect landscape for a solar system. These roofs are usually large and flat with ample room for solar panel installation.

Who designed the Sika Solaroof system?

The Sika SolaRoof system was designed by Sika (roofing manufacturer) and Centroplan (solar installer). Unlike most rooftop solar installations, the roofing manufacturer and the solar installer worked together on this project, and the building owners are the ones who benefit.

Can a factory install a solar system?

To bring these energy costs down, many companies harness the power of renewable energy by adding solar panels to their factory and warehouse roofs. Installing a solar system for your factory allows these facilities to produce their own power on-site for free.

How much can I save by installing solar panels on my roof?

How much can I save on energy costs by installing solar panels on my factory roof? Customers can see a healthy reduction in their bills of up to 80% annually, dependant on the size of the system installed. What is the typical return on investment (ROI) for solar panel installations in industrial buildings?

What is Sika Solaroof?

Sika Solaroof is a comprehensive, integrated solar solution that incorporates the proven performance of Sika PVC roof assemblies with the industry's most innovative PV racking system.
