After deducting the 30% solar tax credit, the average price of a Smartflower comes down to about \$18,900. Assuming their 2.5 kW unit produces the same as 4 kW of a conventional solar PV ...

What is the price of a standard Smartflower solar system? The standard 2.5 kilowatt Smartflower system is priced at \$39,950, excluding the costs for shipping and installation. What is the cost of the Smartflower Plus model?

After deducting the 30% solar tax credit, the average price of a Smartflower comes down to about \$18,900. Assuming their 2.5 kW unit produces the same as 4 kW of a conventional solar PV system, the price is effectively \$4.73 per watt.

So, after deducting the 30% solar tax credit in the US, the price of a smartflower comes down to \$7 per watt of gross DC peak capacity or \$4.55 per watt for equivalent output. It is based on the assumption that a 2.5kW smartflower unit can produce as much electricity as 4kw of roof-mounted solar panels.

The Smartflower solar panel costs anywhere between \$25,000 and \$30,000. The average consumer can expect to spend around \$27,000 for this panel. The difference in the price comes from the range of features you can choose to include in your Smartflower, such as a built-in battery pack. This is much more expensive than other solar systems.

If we consider the price per watt for new solar systems is generally in the \$3-\$4 range in 2023 according to national estimates, then a Smartflower system costs between three and four ...

We provide a very affordable customized price quote. The cost of the Smartflower is reduced by federal, state and local utility incentives because governmental policies are encouraging citizens to adopt solar energy. Please contact a Smartflower representative to discuss getting your customized quote.
