

It's not surprising that consumers and investors in renewable energy are demanding products that emit less GHGs. By converting from outdated aluminum frames to Origami Solar recycled steel frames, solar installations will save over 90% of frame related GHG emissions, or 173,500 metric tons of carbon emissions per GW of solar capacity.

Solar Steel also signed a tracker supply deal for another project with Zelestra earlier in September, and with the three deals now in place, the company will supply close to 6,000 trackers for ...

At Gonvarri Solar Steel, we believe in making a positive impact on both the people we interact with and the environment in which we operate. Environmental 100% of the parts in our structures are reusable and recyclable. Use of green steel in various projects.
