

Solar support shakes

Can solar panels be placed on a south-facing roof?

While many people believe that solar PV panels can only be placed on south-facing roofs, the reality is that modern solar panels will operate on any obstructive roof face, even under dull, cloudy conditions. The right size of solar battery for a home in the UK - that is, the capacity of the battery system - will depend on a variety of factors...

How do you anchor a solar energy system to a roof?

Anchoring the solar energy system to the underlying roof support structure is mandatory. The necessary anchoring penetrations are easily sealed using time-tested flashing methods or UV-resistant sealants. Homes and structures covered with cedar shingles are typically pitched and not flat.

It has a central rotor, to turn the machine left or right relative to the floor, then I have the tower go 8 blocks up with a rotor on either side to control the panel's "wings"; which ...

Adding Solar Panels. To start with, the roofer had to replace 33 sheets of plywood. They were damaged and rotten from being wet under the previous roof. After the roof assembly was ...
