What is a solar pump in Cyprus?

Solar pumps in Cyprus are pumps that work with the energy generated by solar panels. Solar pump maintenance is very important to ensure that the system works as it should and that the water is clean.

Are solar street lights a good idea in Cyprus?

Solar lighting uses LED lights which are very beneficial. Solar street LED lights are water-resistant, cost-effective, and low maintenance. Moreover, their light attracts much fewer insects than regular streetlights. Solar LED streetlights in Cyprus have a longer lifespan and easier installation than common lights, hence the lower cost.

Is net-metering a good investment in Cyprus?

Cyprus is a country the sun rarely abandons and this is a great investment opportunity for individuals and businesses. Net-Metering in Cyprus is a photovoltaic system that helps permanent residents of Cyprus to save on their electricity bills. The consumer chooses which system they wish to install on their roof or plot.

Solar energy, radiant light and heat from the sun, has been harnessed by humans since ancient times using a range of ever-evolving technologies. Solar radiation, along with secondary solar-powered resources such as wind and wave power, hydroelectricity and biomass, account for most of the available renewable energy on earth.
