

Solar water generator

Complete Intelligent Quiet Operation with Comfort at your finger Tips Our Universal Atmospheric Water Generator (AWG) allows you to invert your energy to the electrical box, for use of other appliances if needed. Our Boost Inverters ...

Our Portable water generator extracts moisture from the air, processes, purifies, and converts it into fresh drinking water that exceeds the highest global drinking water standards. It complies with the EPA and the Federal Drinking Water ...

An atmospheric water generator (AWG) is a device that extracts water from humid ambient air. Simply put the AWG captures and filters humid air around you bringing it to its dew point. The water is then collected and filtered again to ...

Our atmospheric water generators stand out for delivering exceptional drinking water quality. Utilizing a robust triple filtration system, the water produced is ultra-pure, with minimal mineral ...

Skywater® machines are atmospheric water generators that use a patented process to condense moisture from the atmosphere making fresh clean drinking water. Each Skywater® model produces fresh drinking water every day, ...

Axios reporter Bryan Walsh highlights how MIT researchers have developed a new solar-powered device that can extract drinkable water from the air and "could help alleviate water scarcity in some of the world's driest ...

The water Spout produces has been tested many many times by third party water testing centers. It's highly pure and free of contaminants. On average, the water from your Spout is of a higher ...

The water production process is based on innovative, patent-protected technology, which extracts drinking water from the moisture in the air around the GENNY. The daily production capacity is ...
