Finally, Czechia is also experiencing a second solar boom, with the total added PV capacity in 2023 surpassing 1 GW, marking Czechia's return to the GW-market stage after 13 years. The country, having experienced a solar boom in the past, was one of the first significant PV markets in Europe. Effective subsidy schemes and the energy crisis have ...

In the first half of 2024, electricity production in the Czech Republic dropped by 5.6% year-on-year to around 36 TWh. Traditional energy sources, including nuclear and coal-fired plants, saw declines, while production from solar and wind energy increased. Solar power, particularly from small rooftop installations, grew by 28.4%.
