

What is the Asian Development Bank doing in Solomon Islands?

The Asian Development Bank is working in partnership with the Government of Solomon Islands and Solomon Power to convert electricity networks in five provinces almost entirely to solar power. This project involves the Asian Development Bank in putting a grid-connected solar power plant into operation by SIEA.

Can photovoltaics be used for rural electrification in the Solomon Islands?

The success of the Sukiki project in the Solomon Islands, where photovoltaics are used for rural electrification, has brought delight to the government and people. They hope that continued use of photovoltaics for rural electrification will serve as a beacon of hope, not just for the Solomons but for the rest of the world as well.

Will the Solomon Islands be submerged in the next 100 years?

As a low-lying archipelago in the South Pacific, the Solomon Islands faces the real possibility that a significant portion of its territory will be submerged underwater in the next 50 to 100 years if global warming raises ocean levels as projected by climate scientists.

**PROJECT DETAIL:** 1MW grid-connected solar (ADB) and 600kW grid-connected solar (UAE)  
**BUDGET:** US\$6m. **FUNDING SOURCE:** ADB and UAE. **STATUS:** Agreement signed with UAE and ADB  
Study/Consultancy services to be engaged in March 2015

The Solomon Islands government has set a 50% renewable energy use for power generation by 2020 to be achieved through its Tina Hydro Development Project and the Savo Geothermal projects, both developments to be commissioned by the end of 2017.---Rural Households Electrification Targets: Diesel self-generation 5% in 2015 5% in 2020, 3% in 2030.

Small scale solar home systems, which have been supplying homes with electricity in rural Solomon Islands for a long time, have become embedded in everyday life and social reciprocity structures ...
