Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

Will Morocco double green electricity production in Western Sahara?

(Bloomberg) -- Morocco, buoyed by recent foreign recognition of its rule over Western Sahara, plans to double green electricity production in the disputed territory to meet growing demand before it co-hosts the 2030 FIFA World Cup.

What is Western Sahara's green power capacity?

Western Sahara's current green power capacity is about 1.3 gigawatts, or about a quarter of the nation's total renewables capacity. A project to develop a 3-gigawatt cable linking renewable plants in the territory to central Morocco has attracted interest from private investors, said the official.

Is Western Sahara a 'question of decolonisation'?

Western Sahara is the only African territory remaining on the list. It's also the only territory where the administering power column is left blank - a footnote explains the UN considers it a "question of decolonisation which remained to be completed by the people of Western Sahara".

Morocco drives renewable energy projects in Western Sahara. Morocco has claimed authority over Western Sahara since 1975, but the UN does not recognise Moroccan control, calling Western Sahara a "non-self-governing territory." The UN has called for a referendum to decide the region's future.
