What is the largest battery energy storage system in Africa?

Leading African independent power producer Globeleq says the 153 MW/612 MWh Red Sands project, which was recently awarded preferred bidder status under South Africa's inaugural battery storage public procurement round, will be the largest standalone battery energy storage system (BESS) in Africa and will carry an investment value of R5.7-billion.

Will solar batteries help South Africa's energy grid?

South Africa's state-owned utility Eskom anticipates that these projects will showcase the effectiveness of batteries in facilitating the integration of renewable energy into the country's energy mix, while simultaneously easing the strain on the national electricity grid.

Why is battery storage important in South Africa?

In South Africa, battery storage is increasingly seen as a key pillar to help provide grid stability and integrate variable renewables given its ageing coal-fired power fleet and grid.

Does South Africa have a battery storage tender programme?

South Africa is aiming to procure utility-scale battery storage with two tender programmes: its Battery Storage IPP Procurement Programme as well as hybrid battery storage and variable renewables projects through its Risk Mitigation IPP Procurement Programme.

Why is energy storage important in South Africa?

Experts say that widespread energy storage is vital to expanding the reach of renewables and speeding the transition to a carbon-free power grid - this is key to helping reduce South Africa's reliance on fossil fuels as it seeks to transition to clean energy.
