What makes up the power sector in South Sudan?

The power sector in South Sudan consists of a mix of public and private sector service providers that engage in electricity generation, transmission, and distribution enterprises. Encouragement is given for the development of electricity through renewable power sources, such as hydro, wind, biomass, solar, and geothermal.

How much power does South Sudan need?

Meanwhile, with an installed capacity of approximately 130 MW, the majority of which is used to supply power to the country's extensive oil fields, South Sudan is currently evaluating ways to meet its power demand of 300 MW by way of renewable energy prospects.

Will South Sudan build a hydropower project near Juba?

The utility is looking for investors to build a 120-megawatt hydropower project near Juba, which could cost \$490 million to construct over five years. South Sudan's government says it also plans to invest in the 1,080-megawatt Grand Fula project proposed near the Ugandan border, though how and when it would do so is unclear.

Will South Sudan replace 11 kV power lines in Juba?

Replacing Juba's 11 kV power lines, the government of South Sudan, has also rolled out a network of 33 kV lines to connect an additional 20,000 local consumers in Juba.

Is South Sudan adding its own generation?

At the same time, the young country is adding its own generation. Late last year, Ezra Group opened a 33-megawatt oil-fired power plant, which will use scrubbers to reduce air pollution. The Eritrean firm says it plans to build 100 total megawatts of fossil fuel capacity in South Sudan by 2021, at a cost of nearly \$290 million.

How many people in South Sudan have electricity?

Today, only about 1 percent of South Sudan's 12.5 million people can access the electric grid, according to the state-run utility. Many people use rooftop solar arrays or noisy, polluting diesel generators to keep the lights on; still many more are left in the dark.
