Does seplos Mason BMS have a defective thermal sensor?

Seplos Mason BMS defective thermal sensor. Hello Guys, With the recent dip in cell prices relative to a year ago, i am looking at purchasing 2 sets of 16 cells of the EVE LF280K. I am going the DIY...

Why does the SOC Drift occur at a BMS level?

I meant this in context of closed loop communication, meaning the SOC is being reported by the Seplos BMS. The drift happens at the BMS level as well because of how they stop counting below 6%. This is independent of Sol-Ark calculations, which are only relevant in open loop mode. Active balance came about from DIY powerwall.

Are there any problems with Sol-Ark BMS?

One downside is, the soc% on these BMS tend to drift from reality if you don't regularly charge your batteries to full. I have found that as long as you charge these all the way once a week or two, the soc corrects itself. No major issues with closed loop comms with Sol-Ark, worked out of box with regular ethernet cable.

Befor ich mir jedoch die BMS kaufe (z.B. Seplos Manson 280 DIY) wollte ich erst mal hier nachfragen, nicht dass es ein teures Spielzeug ist, was meinen speziellen Wünschen nicht genügt. Eventuell hat hier auch jemand mit einer anderen BMS gute Erfahrungen und kann mir von einer anderen Firma eine empfehlen - so lange bekannt ist wie man die ...

Read data From Seplos BMS and send them to the Home Assistant. This is a bash script that read data from Seplos BMS via RS485 port and send the data to the Home Assistan via MQTT. Hardware requirements: Raspberry (i use an RPI4) USB to RS485 adapter; Seplos BMS; Home assitant with configured MQTT broker;

Ich spiele mich gerade damit, das Seplos V16/10E BMS mit einem FSP PowerManager 10k und einem MPP Solar 15KW Hybrid zu verbinden. Zwischen den Geräten habe ich eine BMS-Box und beim 15K ein Modbus-Box-Dual. Leider spricht das BMS noch nicht mit den WR, obwohl angeblich das Pylontech Protocol "gesprochen" wird. Ich habe daher ...
