

Space Solar Power Station Omega

What is a space solar power station called Omega?

The space solar power station (SSPS) capable of providing earth with primary power has been researched for 50 years. The SSPS is a tremendous design involving optics, mechanics, electromagnetism, thermology, control, and other disciplines. This paper presents a novel design project for SSPS named OMEGA.

What is a new design project for SSPs called Omega?

This paper presents a novel design project for SSPS named OMEGA. The space segment of the proposed GEO-based SSPS is composed of four main parts, such as spherical solar power collector, hyperboloid photovoltaic (PV) cell array, power management and distribution (PMAD) and microwave transmitting antenna.

What is SSPs-Omega solar power station?

The SSPS-OMEGA (Space Solar Power Station via Orb-shape Membrane Energy Gathering Array) concept can be described as a modular, spherical system concept in which sunlight is collected with the main reflector and power is generated in a series of PV cell array.

What is Omega SSPs?

presents a novel design project for SSPS named OMEGA. The space segment of the pro- (PMAD) and microwave transmitting antenna. Principle of optics, structure configuration, wired and wireless power transmissions are presented. ©2016 IAA. Published by Elsevier Ltd. All rights reserved. 1. Introduction Glaser in 1968 .

What was the first solar power station scheme?

... The first space solar power station scheme was proposed by Glaser 3 ,and subsequently,the scholars put forward many innovative schemes,such as the integrated symmetric concentrator scheme 4 ,sun tower configuration 5 ,Tethered SSPS configuration 6 ,SSPS reference system 7 ,SSPS-ALPHA 8 ,multi-rotary joints SSPS 9 ,etc.

Will Omega Power a 2 GW grid?

The OMEGA is proposed for supplying 2 GW power into earth's grid,which might be for realization around 2050. Without consideration of environmental adaptability in space,transportation and inventions of revolutionary devices,Table 3 provides a preliminary analysis on system efficiency at current state and for the OMEGA.

The Value of Our Research. The SSPS has many advantages as follows: it provides power 24 hours a day without being affected by weather conditions, unlike terrestrial renewable energy ...

above effects. To realize the collection of solar energy in space according to the idea by Glaser, the
