A typical solar water heater comprises a tank and a panel which is mounted to be exposed to collect heat from the sun. The tanks supplied by Isratech currently range in size from 120 to 300 litres, or 32 to 80 gallons. The factory will assemble similar size heaters. The solar panel incorporates copper, which is a conductor of heat.

Chromagen Residential Solar Hot Water Systems: General Information & Warnings General Info 1 Harness & ladder ties This document contains important information for water heater installers pertaining to the installation of Chromagen solar water heaters and should be read prior to following the specific system or components installation guide.
