

# St Kitts and Nevis solar panel recommendations

Does St Kitts and Nevis have a national energy policy?

Yes, St. Kitts and Nevis has a National Energy Policy (NEP). The key provisions of this policy include connecting large-scale independent power providers and many distributed renewable energy systems to the electrical grid. Not all generation is made publically available; this chart provides known and referenceable data.

How much solar energy does St Kitts use?

In St. Kitts and Nevis, the solar resource averages 5 kWh per square meter. Solar energy is already being used for grid-powered induction lighting and street lights along roadways. A 7 MW waste-to-energy power plant is planned to come online on St. Kitts in 2015.

How much does electricity cost in St Kitts & Nevis?

The electricity rates in the Federation of St. Christopher (St. Kitts) and Nevis are \$0.26 per kilowatt-hour (kWh). This is lower than the Caribbean regional average of \$0.33/kWh.

What is the standard voltage in Saint Kitts and Nevis?

The standard voltage in Saint Kitts and Nevis is 230 V. You can use your electric appliances there if the standard voltage in your country is between 220-240 V. In the UK, Europe, Australia, and most of Asia and Africa, this is the case. Manufacturers take these small deviations into account.

Ultimately, the ECCB installed 3,620 solar panels and 20 inverters with a total capacity of 1,200 kilowatts (kW). As of April 2022, the ECCB project was the largest solar generator on the island of St. Kitts and "the ...
