Smaller solar generators will typically not be able to maintain a consistent voltage during the initial surge and thus the Tesla charger will stop. I always set in the app to start charging at the minimum current (5A). Complexity #2: Unless you go with gargantuan "solar generators" which you have to wheel around, you are limited to 110V.

I am looking for advice on which solar generator to use with my Starlink internet . My plan is to use it as a UPS/EPS to backup my primary power which is not the most reliable. Some solar generators have this feature but their failover speeds can be as long as 30 millisecond.

There is a diesel generator that provides power to the campsite during the day. I just felt better at the end of the day - and it is way cooler too - by not hooking into that power and letting this thing power itself. ... I just got starlink running on solar.. Starlink is drawing around 100watts(but fluctuates between 70 and 110) or roughly 4.5 ...

For a charge controller the Solar Power Hub uses a Morningstar SunSaver 20 PWM charge controller. It can handle about 340W of 12V solar panels. The SunSaver charge controller is not MPPT, so you need "12V" solar panels which have an open circuit voltage (Voc) of about 22v. Two Solarland 160W panels in parallel provide a rated power of 320W.

An off-grid Starlink user achieves "infinite WiFi" with 300 watts of solar And the setup could be used to help hikers on extreme Sawtooth Mountain trails. Published: May 19, 2022 06:48 AM EST

If you are only using the generator for the Starlink then I would say that the generator is overkill. The powerbanks offered today are dependable, rechargeable, and really agile to meet any needs. We boondock camp and use a Jackery 1000 plus to power a 12 volt 32-inch TV and Starlink at night for entertainment and still have power left over foe ...
