

Does North Korea have a two-tier energy system?

Under North Korea's two-tier energy system, which prioritises industrial facilities, the only way for many citizens to access electricity is to pay state functionaries to allow them to install cables to siphon off power from local factories.

Does North Korea have the best weather for solar?

"North Korea may not have the greatest weather conditions for solar, but it is no worse than Britain or South Korea," said von Hippel. "Using renewables is congruent with North Korea's national philosophy of self-reliance." A solar street lamp in the suburbs of Pyongyang.

Does North Korea have a ramshackle electricity grid?

"We would turn the light on when we ate and then we turned it off right away." North Korea's ramshackle electricity grid draws on ageing hydro and coal-fired thermal power stations, many of them built during the cold war with Chinese and Soviet assistance. UN sanctions restrict the regime's imports of refined oil and petroleum products.
