

Will harbour energy leave the Falklands project?

(Photo: Harbour Energy) British oil and gas company Harbour Energy said on September 23 that it was considering exercising an option to exit the Falkland Islands project and would leave the Falklands. According to a statement from Harbour Energy, the Falklands project does have significant resource potential.

Is oil a source of economic security for Falkland Islanders?

Despite the difficulties, Falkland Islanders have come to regard oil as a potential source of economic security. Oil was not a key issue for the residents of the islands before the Falklands War. During Anglo-Argentine negotiations in 1981, two Islanders, accompanied by FCO minister Nicolas Ridley, met Argentine officials in New York.

Does the Falklands need a new wind farm?

But the Falklands feel it is not enough and besides the current wind farm is reaching its renewal date. No wonder then that notice has been given of the planning applications submitted for the Farm Expansion of Sand Bay Wind Farm to include 3 by E70 Enercon wind energy converters and battery storage. FIG and c/o Glenn figure as the applicant.

Is the Falklands project bringing oil to market?

After investing hundreds of millions of dollars and numerous political squabbles, the Falklands project has still not brought any oil to market. Argentina has previously asked stock exchanges in New York and London to warn investors with claims that UK-listed oil companies are operating illegally off the Falkland Islands.

Is oil a factor in British policy towards the Falkland Islands?

This article demonstrates that oil has been a factor in British policy towards the Falkland Islands since the 1970s. It charts the changing perspectives of oil companies and considers how these have informed British policy.

Why did oil companies start exploring the Falklands before 1979?

Before 1979, oil companies were eager to start surveying and exploring the waters around the Falkland Islands. Interest in Falklands oil was fuelled by the sharp rise in international oil prices following the oil embargo by Arab countries in 1973-1974.
