

State Grid official website micro lecture

Are microgrids a state program?

Several states have enacted legislation to include microgrids under existing state programs and incentives. The Connecticut legislature, in particular, has worked to wrap microgrids into state policies designed to support a variety of energy investments for both public and private entities.

Which states have included microgrids in grid modernization initiatives?

Colorado, Minnesota and New Mexico have included microgrids under broad grid modernization initiatives. In Colorado and Minnesota, the legislatures require regulated utilities to develop and submit transmission and distribution system plans to the state PUCs.

What can PUCs learn from Microgrid Applications?

Over the past several years, some State Energy Offices and Public Utility Commissions (PUCs) have explored and learned from various microgrid applications, but many information, research, investment, and policy and regulatory gaps remain.
