STEM School Finland has developed a theme-based curriculum and lesson materials for STEAM learning. During each lesson, children: Ask questions and define problems. Develop and use models. Plan and carry out investigations. Analyse and interpret data. Use computational skills.

Producing industrial high-temperature heat and steam in an emission-free and cost-effective manner usually requires the introduction of just such an electrically operated high-temperature storage. Finland as a country - and we as Elstor Oy as a company - are among the top in the world in terms of the number of these implementations, says ...

A strategic steam reserve (SSR) is a collection of withdrawn steam locomotives which is kept in working order for possible use in a national emergency. During the Cold War several countries, including Sweden, Finland and the Soviet Union, kept SSRs and the United Kingdom is reported to have done so, albeit without evidence.
