

# Storage projects Romania

How much money will Romania get for battery storage projects?

The financial support in the form of direct grants was announced by the government in November 2022, reported by Energy-Storage.news at time, and will go towards at least 616MWh of battery storage projects. The European Commission has approved a EUR103 million state aid scheme from the government in Romania for battery storage projects.

Can storage technologies improve energy security in Romania?

Such enhanced legislation is needed for implementing the Romanian National Energy and Climate Plan (NECP), which lists 'developing storage capacities' as an instrument to improve energy security but lacks detail on how storage technologies will be deployed until 2030.

Does Romania have a storage policy?

In response to EU Regulation 2019/943, which clarifies the role of storage and its ownership status, the Romanian authorities transposed in Law 155/2020 (amending Energy Law 123/2012) specific provisions related to new storage facilities and their management rules.

What are some examples of energy security issues in Romania?

One example is Romania's NECP, which at first did not address storage technology. The updated version of 2020 was marginally improved in this respect, listing 'developing storage capacities' as an instrument to improve energy security, but lacking detail on the storage capacity to be developed until 2030.

Can Romania Invest in clean generation technologies?

To be able to invest in clean generation technologies, the Romanian energy sector must first address its network adequacy issues. Several solutions ought to be considered, ranging from grid reinforcement and expansion, interconnections, storage, decentralised production, and software-based solutions -- demand response, IoT, aggregators, etc.

How long does it take to build a power plant in Romania?

Long construction time (including feasibility analysis and environmental clearance), ranging from 5-10 years. Romania's energy strategies have included a high-capacity PHS starting in the late 1970s. 2 Fundacji WWF Polska (2020).

George-Madalin Chitaru, project manager for local contractor Emergy and also attending, said that it is the largest BESS in Europe built exclusively with equipment produced in the EU. Romania was also in the news recently for reopening a competitive solicitation for large-scale BESS projects, seeking 240MW/480MWh of projects.

Romania wants mature projects that can be implemented quickly and that can help balance the system, he was

quoted as saying. Romania has allocated EUR 80 million under its National Recovery and Resilience Plan (PNRR) for energy storage projects, which is expected to result in contracts for a total of 1.8 GW of capacity, according to Burduja.

Romania has allocated EUR80 million (\$87 million) under its national recovery and resilience plan (PNRR) for energy storage projects, which is expected to result in contracts for a total of 1.8 GW ...

On 21 November 2024, the Romanian government approved a new Government Emergency Ordinance (GEO 134/2024) promoting the elimination of double charging and stimulating the development of energy storage technologies to ensure the transition to a low-carbon economy by amending Electricity Law 123/2012 and Law no. 220/2008 for the promotion of renewable ...

A solar project from developer Econergy in Romania. The country's solar sector is set to grow substantially, which will help the battery storage market kick on. Image: Econergy. The European Commission has ...

A subsidiary of Monsson Group has submitted a proposal for a major battery energy storage project in Romania, seeking an environmental permit for a facility with a capacity of just over 2 GWh. The proposed location for the project is near Constanța, one of Romania's key regions for renewable energy development, especially wind power.

A subsidiary of Monsson Group has submitted a proposal for a major battery energy storage project in Romania, seeking an environmental permit for a facility with a capacity of just over 2 GWh. The proposed location for the project is near Constanța, one of Romania's key regions for renewable energy development, especially wind power.

Monsson Group, controlled by the Romanian-Swedish businessman Emanuel Muntmark, announced plans to invest in power storage capacities of around 1,500MWh by 2030. The total investments are ...

In 2007 Lafarge Cement Romania contracted with Dome Technology to build what would be the world's largest clinker-storage dome. The dome was completed in 2009, designed to increase capacity at Lafarge's cement-production plant in Medgidia, ...

The Ministry of Energy of Romania has reopened a competitive solicitation for battery storage for the grid integration of renewable energy, seeking "at least" 240MW and 480MWh of resources. The Ministry made its ...

The Ministry of Energy announces the launch of the call for projects "Supporting investments in the development of electrical energy storage capacities (batteries)" with funding from the Modernization Fund, within Key Program 1 - Renewable energy sources and energy storage. ... With the completion of these projects, Romania will have more ...

## Storage projects Romania

Renewable power projects of overall 832 MW coming with energy storage units. Out of the 247 projects, for 9.81 MW in total, that have connection contracts and construction permits, 18 of them (832 MW) envisage integrated energy storage. Seven of them or 59 MW are expected to be commissioned before the end of the year, ANRE said.
