

# Subsidies for solar power generation for civilian use

Are subsidies to renewables a good idea?

Subsidies to renewables have been credited with increasing innovation, lowering costs and expanding the energy mix - roles also played by early subsidies to fossil fuels, which were greater than those made to renewables at the same stage of development.

How have subsidies impacted renewables in the UK?

In the UK, subsidies have led to a significant increase in the deployment of renewables. This in turn has led to a rapid decrease of the cost of some of these technologies. Notably, offshore wind projects commissioned in 2022/23 will sell their electricity at £57.50/megawatt hour (MWh).

Will UK government quadruple solar power investment in 2024?

Open Access Government, UK Government to quadruple solar power investment through GB Energy initiative, July 2024. The Guardian, Labour's 'rooftop revolution' to deliver solar power to millions of UK homes, July 2024. Are there different solar panel grants across the UK?

How much does OECD subsidise green energy?

The International Energy Agency (IEA) has calculated that subsidies to aid the deployment of renewable energy technologies amounted to US\$140 billion in 2016. Countries within the Organisation for Economic Co-operation and Development (OECD) subsidise green energy more than poorer, non-OECD countries.

What will funding do for the UK's energy sector?

Funding will accelerate the delivery of clean, cheap, low-carbon electricity to families and businesses, generated by renewable energy technologies such as wind turbines and solar panels. Families across the country have suffered during the cost of living crisis, as the UK's over-reliance on fossil fuel markets was exploited by Putin.

What is the UK's 'green energy support scheme'?

This was published under the 2019 to 2022 Johnson Conservative government. The biggest ever round of the UK government's flagship renewable energy support scheme is opening to applications today (Monday, 13 December), with £285 million available a year for building the next generation of Great Britain's green energy projects.
