What is energy in Sudan?

Energy in Sudan describes energy and electricity production, consumption and imports in Sudan. The chief sources of energy in 2010 were wood and charcoal, hydroelectric power, and oil. Sudan is a net energy exporter. Primary energy use in Sudan was 179 TWh and 4 TWh per million persons in 2008.

How can a comprehensive package of Energy Services build resilience in Sudan?

A comprehensive package of energy services will be needed to build resilience in Sudan's rural communities, especially for those communities that are recovering from socio-economic and environmental shocks including conflicts, climate change induced disasters such as droughts and flooding.

How can Sudan transform its energy sector?

A comprehensive package of technical and financial assistance will be needed to transform Sudan's energy sector. This will involve the development of risk management strategies that effectively promote public and private investments into scaled-up sustainable energy solutions.

Why is energy development important in Sudan?

Sudan faces many energy development challenges brought about by high electricity subsidy levels and climate-induced impacts on hydroelectric generation which has been decreasing at a rate of about 4% per year. Improving access to modern and affordable energy is a development priority for Sudan.

How do solar power systems work in Sudan?

Concentrated solar power systems are also potential options for Sudan. These systems generate electricity when concentrated light is converted to heat which drives a steam turbine connected to an electrical power generator. There are several types of systems available, including parabolic troughs, solar towers, stirling dishes, among others.

What are the potential uses of wind energy in Sudan?

Wind: The major potential uses of wind energy in Sudan are for electricity generation and mechanical power. Wind turbine technology for electricity generation consists of the turbine itself which can be oriented along either the vertical or the horizontal axis.
