

Sun power investment Myanmar

Is Myanmar a good place to invest in solar power?

According to a study on solar resources and solar PV potential in Myanmar conducted by the World Bank, most of the population (75%-85%) lives within a 25-50 km radius of HV power lines, making it a promising location for medium- and large-scale solar projects. In 2017, peak demand reached ~3000 MW.

Why is solar power important in Myanmar?

Myanmar State Counsellor Aung San Suu Kyi praised solar power for its low maintenance costs, reduced emission levels and contribution to the nation's technological development during the Minbu Solar Power Plant's opening ceremony.

What is the peak demand for energy in Myanmar?

In a report published last month titled 'Myanmar Economic Monitor: Building Reform Momentum', the World Bank predicted that peak demand is expected to reach 8.6 GW by 2025 and 12.6 GW by 2030, which is a significant increase from current levels.

What is ASEAN's largest solar power plant?

Constructed on over 836 acres of land, an area equivalent to almost 530 football fields, the Minbu Solar Power Plant will be ASEAN's largest solar power plant according to Thailand's META Corporation - the project's contractor and developer.

Under the Myanmar Investment Law 2016 (MIL), the Myanmar Investment Commission (MIC) classifies a small number of investments as restricted investment activities and an extensive list of investments as promoted investment activities. Restricted investment activities are further divided into investment activities to be carried out only by the union

Only six years sets this second OECD Investment Policy Reviews: Myanmar apart from the first review published in 2014, but much progress has occurred in investment policies and related areas in Myanmar in the interim. Nonetheless, the reform momentum needs to be sustained and deepened for the benefits of recent investment climate reforms to be shared widely and for ...

With Myanmar media reporting that the country produces between 2.9 gigawatts (GW) and 3.1 GW of electricity - which is just enough for 44 percent of the country's population of 55 million people - the 170 MW that the Minbu Solar Power Plant will be capable of generating can only contribute to less than 0.5 percent of the nation's current power demand.
