The DC-DC Series of the INGECON®; SUN STORAGE Power family is a bi-directional DC-to-DC converter designed to operate in combination with DC-to-AC solar PV inverters. Thus, it is intended to create DC-coupled solar-plus-storage systems. Besides, it features the same technology as Ingeteam's PV inverters, facilitating the supply of spare parts.

Sun Storage is a fully managed service that requires no changes to your existing applications and tools. FREE TRIAL CONTACT SALES. Sun Storage. It is designed to provide massively parallel shared access to thousands of Virtual Machine or Container instances, enabling your applications to achieve high levels of aggregate throughput and IOPS with ...

Sun storage: the quest for 24-hour solar power Although solar power is packed with potential, prices are kept impractically high because output drops to zero after sundown. But new innovations in solar energy storage, ...

L'inverter a batteria STORAGE 3Power Serie HV è un inverter per accumulo, trifase, bidirezionale che può essere utilizzato in sistemi connessi alla rete e stand-alone con batterie che hanno bisogno di funzionare fino a 1.500 Vdc. Questo inverter a batteria unico nel suo genere raggiunge una densità di potenza leader di mercato di 490 kW/m³ ...

The STORAGE 3Power C Series is a three-phase bidirectional storage inverter that can be used in grid-connected and stand-alone systems. This one-of-a-kind battery inverter achieves a market-leading power density of 470 kW/m³, as it provides up to 3,660 kVA in just one power stack with a battery voltage range up to 1,300 Vdc.

Im Leitprojekt „Underground Sun Storage 2030“ (USS 2030) wird die sichere, saisonale und großvolumige Speicherung von erneuerbarer Energie in Form von Wasserstoff in unterirdischen Gaslagerstätten entwickelt. Darüber hinaus ...

The INGECON SUN STORAGE Power B Series inverter is a three-phase bidirectional storage converter that can be used in both, grid-connected or stand-alone systems. It features string inverter philosophy applied in its design. The input and output lines are integrated into the same cabinet, in order to make maintenance work easier. ...

In the lead project "Underground Sun Storage 2030" (USS 2030), the safe, seasonal and large-scale storage of renewable energy in the form of hydrogen in underground gas reservoirs is being developed. In addition, all partners involved in the project will jointly gain valuable technical and economic knowledge for the development of a secure ...
