Sunation solar Tajikistan

How much solar energy does Tajikistan have?

According to meteorological services, Tajikistan has between 260 and 300 sunny days a year and enormous solar energy potential. According to preliminary estimates by the Ministry of Energy, the annual potential for solar energy use is 3103 billion kWh.

Is solar energy a good investment in Tajikistan?

In Tajikistan, there are no favourable conditions for the widespread use of solar energy or for attracting investment in this sector. This is happening amid constant energy shortages and a crisis in the country's electric power system. Solar panels in Dushanbe. Photo: CABAR.asia Tajikistan is one of the most vulnerable to climate change countries.

Will Tajikistan have a solar power plant in 2023?

During a press conference of the Ministry of Energy and Water Resources of Tajikistan on February 1, 2024, it was mentioned that in 2023, a USAID-funded solar power plant with a capacity of 600 kW was put into operation in Murghab district.

Should Tajikistan use alternative methods of generating electricity?

The experts believe the country has to use alternative methods of generating electric power more actively so that residents have constant access to it. According to meteorological services, Tajikistan has between 260 and 300 sunny days a year and enormous solar energy potential.

Does Tajikistan have electric power?

This is becoming an acute problem for the country's hydropower system, which produces more than 95% of the country's electric power. In 2023, more than 21.8 billion kWh of electric power was produced in Tajikistan. However, during many years in winter, rural residents of the country have access to electric power only 8-10 hours per day.
