

Suncraft solar energy Armenia

Does Armenia use solar energy?

The Government of Armenia is promoting utilization of solar energy. In 2018 the amount of solar power produced in Armenia increased by nearly 50 per cent. Government figures show that Armenia's solar power average is 60 per cent better than the European average.

Is Solara a green energy company in Armenia?

THIS IS NOW! Solar photovoltaic installation company SOLARA has adopted a strategy to carry out activities in the field of the green economy in Armenia and promote its development. Why Choose Solara? There is a great potential for solar energy in Armenia.

How much does solar power cost in Armenia?

It is Armenia's first large utility-scale and competitively-tendered solar independent power producer. The project will operate under a 20-year power purchase agreement and is expected to have a total cost of \$55 million.

How will Masrik solar benefit Armenia?

Masrik Solar will help assure the reliability of Armenia's electricity supply by increasing the country's peak-load capacity at affordable tariffs, while also contributing to lowering the greenhouse gas emissions from the power system.

What is Armenia's largest solar power plant?

The 200-megawatt plant named Ayg-1 will be Armenia's largest solar power plant with a capacity of around half of Armenia's main energy generator, the Metsamor nuclear power plant. The plant is planned to be built in the Aragatsotn province in an area of over 500 hectares located in Talin, Dashtadem, Katnaghbyur and Yeghnik communities.

Does Armenia import gas?

Armenia imports nearly all its gas--a level of dependence that poses a systemic challenge to the nation. Though the country has no domestic gas or nuclear resources, it does have one important asset: the sun.
