Is floating solar coming to South East Asia?

Adoption of floating solar, like this project in Indonesia, appears to be gathering pace in South East Asia. Chinese inverter maker Sungrow has announced the grid connection of what it says is Thailand's largest floating solar plant - a 58.5 MW project in the northeastern province of Ubon Ratchathani.

Could Thailand lead the way in floating solar?

Other countries in South East Asia could follow the lead of Thailand with the hopes of diversifying their energy options. China and India have helped lead the way in floating solar, but it will be beneficial to see a smaller country adapt this new tool to fit their energy needs.

Are floating PV projects viable in Thailand?

Historically, hydropower reservoirs have been an ideal location for floating PV projects and Thailand, with 2.7 GW of installed hydropower in 2021, certainly has viable reservoirs available. However, there are certain drawbacks to floating PV projects that are not found in land-based projects.

Is floating PV cheaper than a solar farm?

"Overall, floating PV (photovoltaics) is cheaper compared to a solar farm. We save the land costs and we save the land for Thailand," said Prasertsak Chongchawano, a deputy governor of Power Plant Development and Renewable Energy at the Electricity Generating Authority of Thailand (EGAT), the state body in charge of the project.

How big is the solar market in Thailand?

This amount is expected to increase significantly by 2032. With an expected CAGR (compound annual growth rate) of 16.5% over the next decade, this market share is predicted to reach 26.5 billion. Of course, it is not realistic to think that Thailand will achieve its PV benchmarks using only floating solar farms.

Does Thailand have a solar industry?

While Thailand is anticipating growth from hydropower, wind, and biofuels, its most significant expected growth must come from the solar industry. As of 2021, there was an installed solar PV capacity of 2.9 GW. By 2037 the target capacity is 15.6 GW, dwarfing all other forms of renewable energy.

Sunflow Solar Structures Inc is a company based in Lakewood, CO that specializes in the design and installation of solar structures for residential and commercial properties. With a focus on sustainability and energy efficiency, Sunflow Solar Structures Inc aims to provide reliable and cost-effective solar solutions to help customers reduce ...
