

Sunny island off grid system South Georgia and South Sandwich Islands

What are off-grid systems with Sunny Island inverters?

Off-grid systems with Sunny Island inverters are self-sufficient utility grids that are being fed with energy from several AC sources in the stand-alone grid (e.g., PV inverter), from a generator, and/or with DC charge controllers (e.g., Sunny Island Charger). The Sunny Island forms the stand-alone grid as a voltage source.

Does sunny island work with off-grid systems?

The Sunny Island has maximum flexibility, from operation in remote areas to off-grid commercial or home energy management. It gives planners total freedom in the size and type of system and the battery. Works with battery backup systems and off-grid systems.

Can a sunny island battery inverter be installed on a grid?

The new Sunny Island battery inverter can be installed in both self-sufficient off-grid systems, i.e., off-grid as well as in grid-connected applications with an existing utility grid (on-grid).

Can a sunny island be used as an off-grid power supply?

In off-grid applications, the Sunny Island in combination with a battery forms the core of an autonomous electricity supply and, in addition to the integration of PV systems, also makes it possible to control other energy sources such as diesel generators, water or wind turbines.

How does sunny island work?

The Sunny Island regulates the balance between the energy fed-in and energy used and has a management system with battery and generator management and load control. Off-grid systems with Sunny Island are single-phase or three-phase AC distribution grids. The local standards and provisions must be observed.

What is a sunny island inverter?

The Sunny Island inverter regulates the balance between the energy that is fed in and the energy that is used and features a battery, PV array and load management system.

1 South Georgia Island is the only inhabited island, with the summer-only settlement of Grytviken, and the only one regularly visited by cruise ships. Minor islands are ranged along its north coast - those visited by cruises are Willis, Bird, Albatross and Prion, and Cooper. The south coast is exposed to raging winds and waves and is seldom visited - Annenkov is the only large island ...
