

Sweden greenvolt power

Who is greenvolt power?

With a passionate management team with over 18 years of experience, Greenvolt Power is a global producer of renewable electricity which relies on experienced employees putting their know-how and expertise on solar and wind projects, as well as on the energy storage in Europe and USA.

What does greenvolt do?

Greenvolt invests in long term battery infrastructure, to help stabilize the power grid and enable the transition to green energy. We believe in aligning our financial interests with global priorities, as well as with the reliability of the Nordic power grid. GreenVolt addresses the power grid's reliance on fossil fuels.

Why should you choose greenvolt power?

We bring in-house development expertise and significant capital to help customers meet their renewable goals, attain energy independence, and reduce electricity costs. Greenvolt Power is a global power producer with 8.6 GW of solar, battery storage, and wind projects.

Who is greenvolt group?

Greenvolt Group offers a variety of individual or collective self-consumption solutions to generate electricity on-site or close to where the energy will be used. The acquisition of several companies and partnering with the management teams allowed us to build an in-depth knowledge and expertise in each segment we operate.

Does greenvolt use biomass?

Individual and Collective Self-consumption Greenvolt is rapidly expanding its business in three sectors across an increasingly number of geographies. Greenvolt only uses biomass fully aligned with the cascading use principle, producing energy exclusively from forestry residues, agro-forestry residues or from waste wood.
