

Which Tejas Borja Solar tiles are compatible?

Tejas Borja's SOLAR range As another option in the Tejas Borja solar range, we offer a format compatible with our other flat ceramic tile model, the Flat-10. The SOLAR FLAT-10 tile is the same size as 5 ceramic tiles with the same model name and incorporates CIGS technology in its photovoltaic panel.

Does Tejas Borja use solar energy?

Thanks to these technological developments, Tejas Borja has expanded its catalogue to include a range of products which harvest solar energy. These products integrate perfectly into the flat ceramic tiles in the "Flat" range so that they have minimal impact on the original design of the project.

What is Tejas Borja?

In this context, Tejas Borja is joining a new revolution in roofing by having developed a single product which combines both style and energy efficiency. Thanks to these technological developments, Tejas Borja has expanded its catalogue to include a range of products which harvest solar energy.

What makes a Tejas Borja a durable roof?

Durability and performance over time is reinforced by the structure of the product itself and the use of glass-glass panel (double tempered glass) that ensures a durable and watertight encapsulation. Find out more about: Tejas Borja SOLAR product range | Products that are perfectly integrated into flat tile roofs from Tejas Borja "Flat" range.

Why should you choose Tejas Borja?

With an output of more than 143 Wp/sq. m. (power /sq. m.), the benefits of the installation can be maximized without altering the appearance and harmony of the home. Tejas Borja's solar solutions achieve electricity bill savings, helping to reduce the carbon footprint on the planet by not using other natural resources for energy.

At Tejas Borja, we have a technical team who can give advice on the design and specifications of a roof installation using SOLAR tiles, depending on the needs and requirements of each project. We carry out feasibility studies to optimise the installation ...
