

Who is Tema energy?

TEMA Energy manufactures high quality equipment and components for the Oil&Gas and Power Generation Industry. We strongly believe in people, who are our main source. Our technicians and employees are highly qualified and we constantly invest in their professional growth.

What type of energy is used in Niger?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Niger: How much of the country's energy comes from nuclear power?

What is the energy potential of Niger?

Niger has significant energy potential, rich and varied, that is weakly exploited. It consists of biomass (firewood and agricultural residues, the main source used by households for cooking), uranium, mineral coal, oil, natural gas, hydroelectricity and solar energy.

What certifications does Tema energy have?

TEMA Energy has an integrated Quality System for Management and Welding certified according to ISO 9001, ISO 3834-2 and ISO 1090-1, as well as a Health, Safety and Environmental HSE system certified according to ISO 14001 and ISO 45001.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

Does Niger have natural gas?

Natural gas is part of the riches contained in soil of the Niger, but its exploitation has not yet begun. Reserves are estimated about 18.6 billion m³. The hydroelectric potential, meanwhile, is estimated at approximately 280.5 MW, including 130 MW in Kandadji, 122.5 MW on the River Niger in Gambou and 26 MW in Dyondyonga on Mekrou.
