

Tesla installs solar photovoltaic panels

How do I buy solar panels from Tesla?

Buying solar panels from Tesla is fast and simple. We use an online and virtual process to provide you the best value system and fastest time to installation. Learn more about installing solar for your home.

Does Tesla install solar panels?

While there can be dozens of solar installers to choose from in a single area and hundreds across the country, Tesla remains one of the largest in the nation. It now installs solar panels and its unique Solar Roof in all 50 states and promises to match the prices of its competitors for solar panels.

How does the Tesla Solar panel installation process work?

The Tesla solar panel installation process begins with scheduling and preparing for your installation prior to your actual installation day. Once your system design is finalized and we have the necessary approvals to move forward with your project, we will schedule your installation on the first available date.

Are Tesla Solar panels worth it?

Tesla solar panels are much cheaper than the average solar panel installation, and Tesla has a price match guarantee if you find an installer charging less. The product warranty is almost twice as long as the industry average, which is great if you run into an issue down the road.

Where is the Tesla Solar roof being installed?

At the moment, the Tesla Solar Roof is being installed in various locations across the United States. At the October 2019 unveiling, Tesla's senior director of energy operations Kunal Girota explained that Tesla is installing retrofit solar panels in 25 states, and it will be offering the roof in all of those states.

Does Tesla have a solar system?

Either way, Tesla's solar energy system usually delivers bang for your buck. In addition to solar panels, the total price you pay to go solar includes equipment like the inverter and racking systems, installation, taxes, and other business costs. Tesla produces its own inverter and hardware, which helps its affordability.
