

How much power does a Viking Energy DP-I have?

Download specs. The "VIKING ENERGY", built in 2019, is a DP-I shallow draft multipurpose workboat of 26,48 by 11,00 meters. The twin Caterpillar engines delivering 1.940 kW which results in approx. 35,0 tons bollard pull.

What is the Viking Energy?

The VIKING ENERGY is the world first LNG-fuelled PSV. The construction of the hull and superstructure was subcontracted to the Polish shipyard Maritim in Gdańsk from where it was towed to Kleven Verft in Ulsteinvik, Norway, for outfitting. The vessel was designed by Vik-Sandvik to meet industry demands for minimising greenhouse gas emissions.

What can a Viking Energy carry?

The Viking Energy can carry fuel oil, water ballast or drill water, potable water, methanol, brine, liquid mud and dry bulk. The Viking Energy is the world's first LNG-powered supply vessel. The bridge of the Viking Energy. The touchscreen operating console used on the bridge. Diagram of the piping on the Viking Energy.

How much does a Viking Energy weigh?

The vessel has a gross tonnage of 5,073t and a net tonnage of 1,521t. Its deadweight is 2,886t at 5.9m draught. The Viking Energy features dual fuel engines, with a consequence that it can run on both LNG and ordinary marine diesel oil in any proportion.

Can a Viking Energy run on a diesel engine?

The Viking Energy features dual fuel engines, with a consequence that it can run on both LNG and ordinary marine diesel oil in any proportion. Using LNG results in a 90% reduction in the outlet of NO_x (approx. 200t a year) as well as a 30% reduction in CO₂. Tests have shown that the vessel has a fuel economy rate of 30% better than that of diesel.

Can the Viking Energy run on LNG?

The VIKING ENERGY features dual fuel engines, so is able to run on both LNG and marine diesel oil in any proportion. Using LNG results in a 90% reduction of the outlet of NO_x (approx. 200t a year) as well as a 30% reduction in CO₂.

WITH the Viking Energy turbines going up at some considerable speed, islanders on both sides of the argument over the controversial project will have to get used to the new reality. While getting used to the turbines in time is one thing, islanders opposed to the plans felt that there was nothing they could have done to stop the Viking project ...

When completed, the Viking Energy wind farm is expected to generate enough clean electricity to power up to

Thailand viking energy multicat

475,098 Scottish homes while saving 500,000 tonnes of carbon dioxide emissions annually. Each of the turbines has a tip height of 155m, which includes a hub height of 96.5m for the nacelle and the blades with a length of 57m each. ...

The court recently ruled the competitors use of a Viking ship logo as well as the Thai words for Viking sailing ship, which the company is known as in the country, were a violation of Yara's intellectual property rights. Yara is currently undertaking a significant branding campaign to ensure it is known as the only Viking fertilizer in Thailand.
