

The Gambia biofuel storage

The Gambia 10% Morocco 20.10% Egypt 26% Tunisia 26.57% Gambia has an average social security rate when compared to major competitors. Utility costs in the Gambia are higher compared to costs applied in more developed economies. However, Gambia's utility costs are inferior to other non-oil producer low

A proper storage system would prevent excess sargassum from collecting on beaches and decomposing. Storage could also ensure that fueling efforts don't remain idle when less sargassum is on the beaches. Wahlen and his team are looking into a silage-based storage system for the sargassum as it awaits conversion into biofuel.

33% of total biofuels use, accounting for 39%, 29%, and 13% of biofuel use in Asia, Latin America, and Africa, respectively, and 41% and 51% of biofuel usage in India and China, respectively [28].
