

The Gambia distributed power solutions

Is there a solution to energy problems in the Gambia?

Policy makers across Africa have been among the last to embrace RE as a solution to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that RE has a real future in the energy mix of The Gambia. They need to demonstrate this by their actions.

Who owns a power plant in the Gambia?

These are operated by National Water and Energy Company (NaWeC) and Global Electric Group (GeG) - an independent Power Producer (IPP). Effective installed capacity in The Gambia is around 65 MW. This is divided into two generation and transmission categories.

Can the Gambia transform the energy sector?

An unprecedented level of support from the international community provides The Gambia with the opportunity to transform the energy sector and emerge as one of the leading energy sectors in the sub-region and the African continent. In this context, the Electricity Roadmap has undergone its third update since 2015.

Can communities benefit from renewable electricity support in the Gambia?

Communities who do not have access to the electricity network are one of the main groups with potential to benefit from renewable electricity support. However, community investment in the Gambia presents serious challenges. It is difficult for communities to access finance and develop the skills and knowledge required.

What will the Gambia's future energy strategy look like?

This should form part of The Gambia's future energy strategy. High transmission and distribution losses (over 30% in The Gambia) worsen the energy security problem. They also deepen suppressed demand. Those with the ability to pay will turn to on-site generators. All these have economic, social and environmental costs.

How will the Gambia benefit from regional power development?

West African regional power development work is progressing with a number of transmission and rehabilitation projects already completed. It is expected that The Gambia will benefit from importing more power than it will produce domestically. Furthermore, RE technologies are likely to play a major role in developing an integrated power pool.

June 9, 2024: Caterpillar Inc. and Distributed Power Solutions (DPS) Forge Global Power Partnership. We are excited to announce our strategic partnership with Caterpillar Inc. as a designated Global Power Provider for Cat® Electric Power! With DPS's specialization in temporary power and Caterpillar's cutting-edge products, we aim to meet the ...

Banjul, The Gambia- Karpowership has been connected to The Gambia's national grid since May 2018 and

The Gambia distributed power solutions

been providing reliable and affordable electricity since first day of operation. Karadeniz Powership Koray Bey, with its 36 MW has helped to significantly reduce the electricity supply gap in the country.

Four power-plant solutions ensure reliable energy supply in Mali, Senegal, Gambia and Guinea. MAN Energy Solutions has announced that it is to supply the power-generation technology for two new ...

political power and religious values in the eyes of his followers. Marx (1970 in Surin, 2013) observes that elites are able to assert divinely ordained positions through religion. They exploit religion to reinforce social hierarchies by promoting obedience and submission. This power dynamic seems to be reflected in The Gambia under Jammeh's ...
