

What are the benefits of solar power in the Gambia?

Clean Energy: Produces 23MW of clean solar power, reducing greenhouse gas emissions and contributing to environmental protection. **Energy Security:** Increases energy independence and strengthens the stability and reliability of The Gambia's power grid.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

Is the Gambia a peaceful country?

The Gambia is one of the safest and most peaceful countries in Africa with a high degree of political stability. In the most recent Global Peace Index, it finished #5 in Sub-Saharan Africa out of 44 countries.

Solar panels and complete set of agricultural pumps will get by paying only 10% amount to General category farmers. Beneficiary share for Scheduled Caste and Scheduled Tribes farmers is 5%; The remaining amount is subsidized by the Central and State Governments; Pumps ranging from 3 to 7.5 HP capacity depending on area of the land.

The Gambia Sustainable Energy Sector Program - With a budget of Euro 136 million from the European Investment Bank, World Bank and others, this project began in 2018 and seeks to restore and modernize the energy transmission ...

The components of a Grid Connected Rooftop Solar PV System shall essentially comprise but not be limited to crystalline solar PV Panels/modules of required number, Inverters/PCU, module mounting structures of minimum 300 mm ground clearance at the lowest point from the roof surface, total Cable/wiring up to 30 m in length.
