

The Gambia yes your energy solutions

Is re a solution to energy problems in the Gambia?

Policy makers across africa have been among the last to embrace Re as a solu-tion to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that Re has a real futurein the energy mix of The Gambia. They need to demonstrate this by their actions.

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians,the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

What type of energy system does the Gambia have?

The Gambia has a dual energy systemcontaining co-existing traditional and modernised energy systems and practices. On the one hand,traditional biomass fuels and inefficient technologies dominate household energy needs. On the other,a modernised energy system uses electricity and more refined fuels as well as modern appliances.

Does the Gambia have a wind-related energy project?

There is limited experiencein wind-related energy projects in The Gambia. much of the early work was restricted to village water pumping projects. in the 1990s,the Department of Water Resources (DWR) actively promoted the use of wind pumps along coastal villages with support from the eU.

What will the Gambia's future energy strategy look like?

This should form part of The Gambia's future energy strategy. high transmission and distribution losses (over 30% in The Gambia) worsen the energy security problem. They also deepen suppressed demand. Those with the ability to pay will turn to on-site generators. all these have economic, social and environ-mental costs.

Is the Gambia a sustainable country?

The Gambia has built credible human capacity in some renewable applications,such as solar photovoltaic (PV) and water-heating systems. however,as yet,there are no government or NGO-led public education programmes and no formalised technical training programmes.

Thus, The Gambia is becoming increasingly well positioned to help diversify its energy mix by incorporating new sources of renewable energy. H.E. the Vice President Dr. Isatou Touray presided (<https://bit.ly/3Ely2qN>) over the inauguration of a EUR2.7 million project named Renewable Energy Potentials in The Gambia on September 6, 2021.

However, the disconnect between resource availability for individuals to adapt to exposures such as extreme
