What is the planning and Decision Guide for solar PV systems?

The Planning and Decision Guide for Solar PV Systems ("GUIDE") is intended for use by solar PV consultants /installation contractors,together with their home builder and home owner clients,to assist them in integrating solar PV technologies into residential applications.

How many UL standards are there for PV modules?

Contribution of UL technical expertise in PV modules emerges from second edition of IEC 61730. There are more than a thousandsafety standards including PV related standards in Underwriters Laboratories Inc. PV specific UL standards are shown in Table 5. UL standards are recognized worldwide for product safety. Table 5.

How much weight does a PV system add to a roof?

A conventional PV system that includes racking materials will add approximately 6 pounds per square footof dead load to the roof or structure,though actual weights can vary for different types of systems. Wind will add live loads; the magnitude of live loads will depend on the geographic region and the final PV system.

What are the different types of solar PV installations?

It is possible to divide the solar PV installation into two groups namely,Low power and High power. Low power PV installations are normally roof-top and microgrid,where the consumer has invested mainly for self-consumption and probably feed excess to the grid.

Will NEC codes affect a rooftop PV system?

orlondonline.com/2014/09/new-nec-codes-will-afect-installations-2.33 2014 NEC,Section 690.12.34 The rapid shutdown provisions require that,for conductors more than five feet in length inside a building,or more than ten feet from a PV array,control circuits as part of a rooftop PV system have the ability to reduce volta

What are IEC standards in photovoltaics?

IEC standards in photovoltaics were developed by TC82"Solar photovoltaic energy systems" . The U.S technical advisory group (USTAG) feeds the input to IEC TC82 standards time to time. Both IEC and American Society of Testing and Materials (ASTM) International had published numerous PV standards in which many are similar and redundant.
