

The photovoltaic slab stone pier fell down

Will a storm damage a Grade II pier?

Plans have been submitted to repair a Grade II-listed lighthouse and pier damaged by a storm. The century-old South Pier Lighthouse and Pier in South Shields was hit by Storm Babet in October, which saw its dome ripped off by strong winds.

What happened to South Pier Lighthouse & Pier in South Shields?

South Tyneside Council's planning department has given the go-ahead for repair works at the iconic South Pier Lighthouse and Pier in South Shields, which has been a landmark for over a century. The site has been cordoned off for months following significant damage caused by Storm Babet in October 2023, which wreaked havoc on our nation's coastline.

Can a Grade II pier be repaired?

Earlier this year, the Port of Tyne Authority submitted a planning application seeking permission for essential repairs to the Grade II-listed pier and lighthouse. The proposed repair works include fixing the lighthouse, replacing an internal lantern, mending internal damage, repairing the pier wall, and restoring balustrading on the pier edge.

Will Tynemouth & Souter Lighthouse be used to re-build South Pier lighthouse?

Planning documents supporting the restoration project revealed that construction details from Tynemouth Lighthouse and Souter Lighthouse in South Shields would be used to "inform the re-construction of South Pier Lighthouse".

How would a lighthouse repair work benefit the pier?

It was contended that "comprehensive and sensitive" repair works would "have a high beneficial impact, greatly enhancing the ability to appreciate the lighthouse's architectural interest and improving the character and setting of the rest of the pier".

What are the public comments on the pier & Lighthouse proposals?

In a council consultation exercise on the proposals, three public comments were received, with concerns raised about access to the pier and lighthouse and the timeframes for the repairs.
