Weekly discussions on the latest news and trends in energy, cleantech and renewables. The Inside Track. Our weekly round up of the latest opinions, new, industry analysis from our global analysts.

The science is irrefutable and globally agreed: to stop the climate crisis from becoming a permanent catastrophe, we must limit global heating to 1.5 degrees Celsius. To do this, we must get to net zero emissions of greenhouse gases by mid-century. Countries making up about two-thirds of the global economy have committed to do so. This is encouraging, but we ...

Meanwhile, there is insufficient data to assess the progress that Timor-Leste has made towards achieving the low birth weight target, nor is there adequate prevalence data. Some progress has been made towards achieving the exclusive breastfeeding target, with 65.0% of infants aged 0 to 5 months exclusively breastfed.
