

Tokelau kes energy solutions

Can Tokelau support itself with solar energy?

Tokelau, an island nation in the South Pacific, is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

Where does Tokelau get its electricity from?

Except for that part of the electricity supply provided by Solar Photovoltaic (PV) to TeleTok facilities on all three atolls and the University of the South Pacific (USP) facility on Atafu, essentially all energy in Tokelau currently is from imported petroleum.

Why is electricity so expensive in Tokelau?

Before the PowerSmart systems were installed on the nation's three atolls, Tokelau was highly dependent on imported fossil fuels to meet its energy needs and therefore vulnerable to international price fluctuations and increasing fuel costs, making electricity extremely expensive for both households and businesses.

What is Tokelau's energy policy?

The primary focus of the policy is the desire of Tokelau to become self-reliant in energy through a combination of renewable energy and energy efficiency measures.

Why did Tokelau switch to solar?

Yet despite the challenges involved in installing comprehensive solar systems in such a remote location, switching to solar was absolutely crucial for the tiny collection of islands. "Tokelau's atolls are low-lying and especially susceptible to the adverse effects of climate change," Mayhew stressed.

Does Tokelau have access to non-New Zealand capital funding?

Currently Tokelau has limited access to non-New Zealand capital funding. To assist addressing the energy sector issues in year 2004 the first ever Tokelau National Energy Policy and Strategic Action Planning (NEPSAP) was developed and approved after extensive preparation and consultations.
