

Tokelau solar edge company

Can Tokelau support itself with solar energy?

Tokelau, an island nation in the South Pacific, is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

Will Tokelau's solar energy system be upgraded?

Tokelau's solar energy system is set to be upgraded on each of its three atolls. Jointly funded by the governments of Tokelau and New Zealand, the \$NZ9 million (\$USD5.7m) system will be installed by New Zealand company Vector PowerSmart.

Who will install a new solar system in Tokelau?

Jointly funded by the governments of Tokelau and New Zealand, the \$NZ9 million (\$USD5.7m) system will be installed by New Zealand company Vector PowerSmart. Tokelau's existing solar system was eight years old and in need of upgrading because of increasing demand for electricity and wear and tear from the harsh marine environment, it said.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world, and together they are capable of providing 150% of current electricity demand in Tokelau, a much higher amount than the 90% that was originally planned for.

Why did Tokelau switch to solar?

Yet despite the challenges involved in installing comprehensive solar systems in such a remote location, switching to solar was absolutely crucial for the tiny collection of islands. "Tokelau's atolls are low-lying and especially susceptible to the adverse effects of climate change," Mayhew stressed.

Why is electricity so expensive in Tokelau?

Before the PowerSmart systems were installed on the nation's three atolls, Tokelau was highly dependent on imported fossil fuels to meet its energy needs and therefore vulnerable to international price fluctuations and increasing fuel costs, making electricity extremely expensive for both households and businesses.

SolarEdge is the clean energy solutions company, improving the way solar energy is produced, consumed, and managed across a wide range of applications and industries. ... and is one of the world's leading PV inverter manufacturers with a solid reputation for cutting-edge technology.

Mr. More was the sole seed investor in SolarEdge through his fund group, ORR Partners, and participated in all successive rounds until the Company's public offering in March 2024. Mr. More has served as a member of SolarEdge's audit committee and has chaired both the Company's compensation committee and technology
