

What are the energy sources in Latvia?

energy sources in Latvia's energy mix are renewables and oil. Increased production of renewables has helped bring down Latvia's import dependency, which is slightly below the EU. However, further diversification of suppliers and still greater use of renewables would improve the energy situation of Latvia.

What are the new energy saving measures in Latvia?

In line with the Save Energy Communication, Latvia launched new energy saving measures, such as: Behavioural measures in public sector

What is the EU's energy policy for Latvia?

The current EU policy dictates that Latvia must increase the share of renewable energy in its final energy consumption and Latvia has plans to reach 50 percent by 2030 according to the EU's National Energy and Climate Action Plan 2030. Much of Latvia's heat and electricity still comes from imported natural gas.
