

Transalta renewables Eswatini

Who is TransAlta Renewables Inc?

About TransAlta Renewables Inc. TransAlta Renewables Inc. is among the largest of any publicly traded renewable independent power producers (IPP) in Canada.

Does TransAlta own RNW?

Under the Arrangement, TransAlta acquired all of the outstanding common shares of RNW (each, a "RNW Share") not already owned, directly or indirectly, by TransAlta and certain of its affiliates, resulting in RNW becoming a wholly owned subsidiary of TransAlta.

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

Is Transalta a good company?

Today, TransAlta is one of Canada's largest producers of wind power and Alberta's largest producer of hydro-electric power. For over 111 years, TransAlta has been a responsible operator and a proud community member where its employees work and live.

Eswatini currently relies on South Africa and Mozambique for 80 percent of its power supply, which puts them in a particularly vulnerable position given regular power shortages. As such, Eswatini has issued a ...
